Re: Ltg Timothy J Maude Complex
Ft. Knox, Kentucky

Dear Tony,

I wanted to take this opportunity to express my appreciation to you and your team for the effort you afforded our company in both pursuing and constructing this project. This was a very sophisticated request for proposal we embarked on as a team. Your preconstruction department did an accurate job of preparing and managing the budget throughout the entire design process. We recognize the difficulty in both preparing a competitive budget and ensuring the outcome upon completion of the design and of course the actual construction.

I would further make note and offer praise on your company's willingness to support the design engineers with viable cost effective material recommendations and workable standard construction/erection details. Your company exemplified the spirit of teamwork on this project and again we offer our gratitude.

In closing, I would openly recommend your company, "in jest" *not to our competition of course*, to anyone looking for a professional group who practices accountability and has the capability to assist the engineer with developing a constructable building.

Sincerely,

Donald Hellen
Huntsville Manager of Preconstruction
